

How Workato Can Supercharge Your HR & People Operations

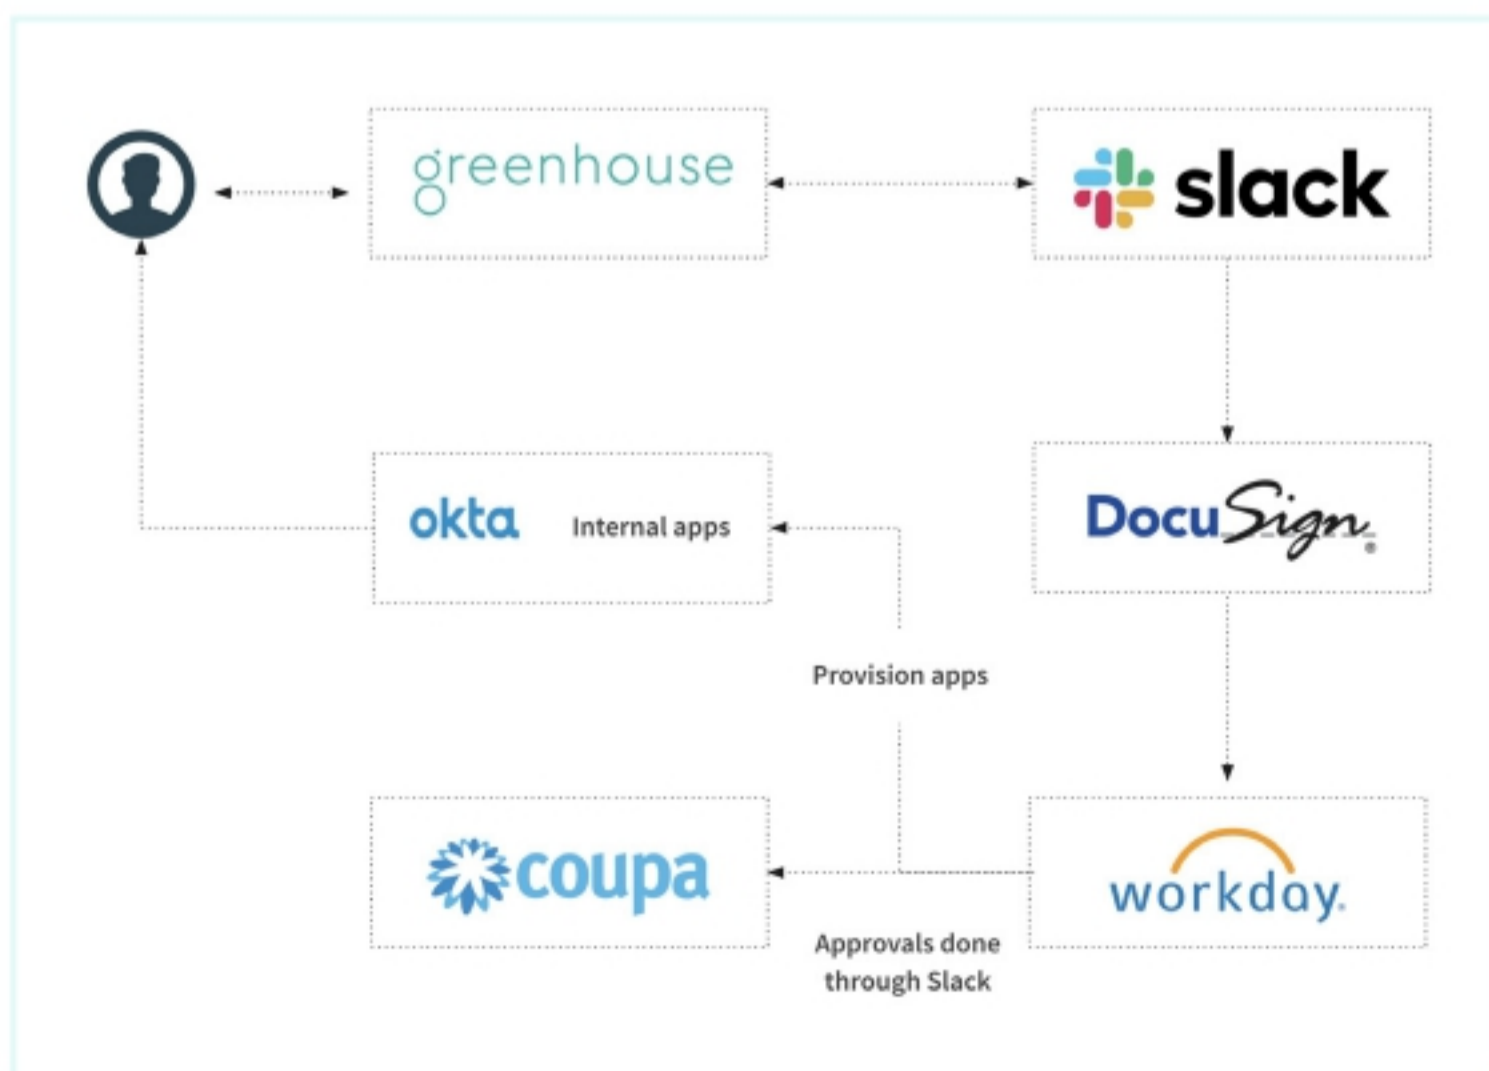

What is Workato?

The leader in enterprise automation, Workato helps organizations increase their operation's speed, scale, and accuracy by automating common business processes. Workato is built on a foundation of integration to deliver automation at scale across data, applications, and teams. Workato's low-code/no-code platform enables builders across lines of business such as HR, finance, and marketing to design automations in collaboration with IT, ensuring security and governance are never compromised.

Streamline processes, delight employees, & create the future of work

HR & People teams are faced with a near-impossible mandate: find the best talent, get them on board quickly, and create an incredible employee experience that keeps people around, all while staying compliant and doing most of this in a remote/digital environment. Workato partners with HR/People teams to automate their core processes, create innovative interactive experiences with bots, and drive insight with accurate and compliant data.

How Slack hires & onboards using Workato

RESULTS :

- \$240,000 in savings annually
- Ability to offer candidates 2x faster, meaning less risk candidates will accept somewhere else.
- A better experience for candidates, recruiters, and hiring managers

[With Workato] we built the Recruiter Bot. This Bot was built to help our People team go faster with Recruiting. Radically reduced time-to-hire for HR partners. RecruiterBot started simply reminding Interviewers to complete candidate scorecards by DMing them in Slack - decreasing the time for interviewers to submit candidate feedback by 40%.”
